FREE WordPress Support
We will provide support for any WordPress issue you are having on your website that is causing it not to function properly. This means if anything breaks on your website, we will jump into action to fix it at no extra cost.

LiteSpeed Web Server
Our hosting environment runs on a LiteSpeed web server which is the fastest web server in the world and uses the least server resources. That allows website owners to have faster websites.

Full 24/7 management
Your hosting hardware and software is fully managed by us 24/7/365. We answer any questions you may have related to your server and we fix any issues that arise proactively to eliminate any downtime.

FREE website migration
We will migrate all your websites from any platform and server at no extra cost and will verify all of the migrated websites function correctly on the new server. The only thing you need to do is provide the login details to your old hosting server. Free migrations are only completed when a hosting account is set up. This is only free at the time of hosting plan purchase.

FREE SSL certificates
Each of your websites will get a free Let's encrypt SSL certificate, automatically installed.

Shield security protection
Shield is an innovative security solution which blocks 99.998% of the web attacks to your website. It also monitors your website in real-time and notifies you if a hack occurs.

Daily disaster recovery backups
Your daily backups are stored on a remote backup server in a remote data center. This ensures that your backups are always safe.

HTTP/3 support
HTTP/3 uses the new Internet transport protocol QUIC which makes your websites faster and more reliable.

One Click Website Restore
You can restore any file, email or database from your control panel with a single click on the mouse.

Infection FREE Guarantee
We are so confident that your website will not get infected in our hosting environment that if it ever does, we will clean it at no extra cost.
